

Hudl Play #	Video Time	Where to Look	Question to Ask	Notes
1		#6 Defense	Is this a flagrant personal foul by #6 of the defense?	This is not a flagrant foul. It is possible that the two defenders only collided with each other and it is not a foul at all. Personal foul without ejection would be an acceptable outcome. Key on this formation have us spread out. The offensive
2		Formation	Is this a legal formation? If not, where is the foul enforced from?	Illegal formation. Between 5 and 6 players in backfield, depending on judgement. Definitely more than 4 in the backfield.

3		Receiver and defender at the bottom of the screen.	Is this a foul for blocking out of bounds?	There is not rule against blocking out of bounds in HS. Could be DPI if ball was in the air when block occurred. Also, factor in where the ball is thrown when you think of making a quality call.
4		Runner's progress.	What is the correct progress spot?	Runners hand but no other body part down. Progress 42.
5		Block near the 41 yard line.	Is this a blindside block?	Likely was a BSB. L will be looking at catch and may not see this whole block. B should pick up blocking player when his original key cuts back toward the ball.

6		Hit on receiver.	Is this a foul against a defenseless player?	Not a foul. Clean hit to the midsection with helmet to the side.
7		Coach wanted DPI on player near 40 yard line.	Is this a foul for DPI?	Not a foul, not enough contact. Even if it was more contact the ball was thrown too off target. Good mechanics by L to read the play and let it pass.
8		Block by slot receiver, top of screen.	Is this a foul for holding?	Clearly a foul. H could/should have a flag too since this is the point of attack to his side and it was his key at the snap.

9		Mechanics by L.		Great hustle. Would help to slow down once you see that contact will be made around the 25. Keep a distance from the play until colors separate. The spot is the spot and partner can help with crossfield. Good hustle.
10		QB pass into the ground.	Is this a foul for grounding?	There is a receiver in the area. R should be able to see this and point to receiver, but H should be the one to recognize and point to the receiver informing him there was a receiver in the area and it is not grounding.

11		Dead ball action outside the numbers after the tackle.	Is this a dead ball personal foul?	This very well could be a foul. H needs to be patient with coming on the field so he can remain safe and also see all action. B should be able to rule on this action too.
12		Hustle by L		Great hustle, don't forget to kill the clock first. Kill clock signal is what starts play clock. Hand up is only for player down inbounds short of the line to gain.

13		Action by the tackling player.	Is this a foul for UNR?	This could be a dead ball UNR. Progress was stopped, so the play was dead. This is dead ball action. Need to decide if he was finishing the play or commits a second act. Could have implications for first down status depending on down.
14		Hit on receiver catching the ball.	Is this a flagrant targeting foul?	This could be a hit above the shoulders of a defenseless player, video not very clear.
15		Block by receiver closest to the sideline.	Is this a foul?	Marginal.
15		Block by RG.	Is this a foul.	Not a foul even if it were point of attack.

16		H as the run comes to him.		Need to stay safe. When you read the play coming at you. Back up and then into the backfield.
17		TE bottom of formation	Is this illegal motion by the TE?	This is illegal motion for two reason: he started on the line and was not 5 yards in the backfield at the snap AND he was moving forward, "shaving", at the snap.
18		TE bottom of formation	Is this an illegal Block Below the Waist on TE?	This block is legal. With tight splits the TE can be within the free blocking zone.

19		Recevier block on #96	Is this a block in the back?	Yes. Good call by H. H needs to see play coming to his side and get back and into the backfield.
19		RT #68	Is this a block in the back on RT #68?	This is marginal at best. He over pursued and it was no longer the point of attack.
20		Receivers in formation	Is this a foul for illegal shift?	This is a foul for illegal shift. Receivers are not set. Still moving hands, feet, and body. They don't all come to an absolute stop and remain stationary simultaneously without moving hands/feet
21		Second defender as runner is going down.	Is this a foul for a late hit?	Could be marginal foul call. Could be well timed.
